Let PowerInbox Web Ads **Simplify Your Monetization**

- Display ads from our rich quality native demand for web

- Global coverage with 100% fill rate

- Flexible native ad units that adapt to your needs

- Granular, frequently updated, reporting API at your disposal

- State of the art LiveRPM optimization

Simply put: our experience with PowerInbox's Web Ads has been excellent. From the start, we saw higher engagement and 10% higher CTR on average vs. units from our legacy ad partner, even with legacy ads retaining the prime real estate. Adding just 3 PowerInbox placements on our highest-trafficked pages – even below the fold – drove our ad revenue up 25% in just the first month. Clearly, we've been extremely happy with the results.

Gary Strockbine, Head of Digital, MD.com
